John Smith Legacy

99 days, 12 hours, 2 minutes, and 0 seconds left until MineCon 2015

Introduction

Hello and Welcome, here you will find the John Smith Legacy Resource Pack and my own modified version called "JimStoneCraft Edition" both for Vanilla Minecraft, the JSC release is a branch of the standard John Smith Legacy Resource Pack.

This all started a few years back when I started playing Minecraft and wanted to make a mob spawner, I found [Monkeyfarm's](#) YouTube tutorials, watched way too many Lets Plays and I got hooked on the look of the John Smith texture pack.

After about a year or so the original author (JohnSmith) decided to no longer update the pack, the community took over and renamed it John Smith Legacy, I joined that project and slowly as all the others went onto the modded game and the millions of textures needed for that, I stuck with the Vanilla game, took over the hosting and control of that release, so here we are.

I hate advert banners, popup and other tricks to get you to click on stuff (adf.ly etc...), you don't have to donate to download these resource packs and you will never have to pay anything to use them, the donate (Pay with Card) button is there only if you wish to show your support for this project, thanks in advance!

Minecraft 1.8.3 - The Bountiful Update (Current Release)

These Resource Pack has been tested using MCPatcher 5.0.0_02 and OptiFine 1.8.1 HD U B2. (please note that Optifine doesn't currently have all the features that MCPatcher has), also if you use any other non-supported mod I cannot offer any help or support.

[John Smith Legacy 1.8.3 v1.3.12](#)

21st February 2015 - 1.8.3 - 13.1MB - [Changelog](#)

[John Smith Legacy JSC v1.1.12](#)

21st February 2015 - 1.8.3 - 12.4MB - [Changelog](#)

What's the difference between John Smith Legacy & John Smith Legacy JimStoneCraft Edition?

Minecraft 1.8.3

John Smith Legacy is the more traditional John Smith Style, JimStoneCraft Edition (JSC), uses the smooth cobblestone, ores and lots of other personal tweaks to virtually all the textures.

It's the pack I personally play with and some people asked if I would post it so I did.

Minecraft 1.7.10

John Smith Legacy is the more traditional John Smith Style, JimStoneCraft Edition (JSC) uses some of the more advanced MCPatcher features, uses the smooth cobblestone, ores and lots of other personal tweaks to virtually all the textures.

It's the pack I personally play with and some people asked if I would post it so I did. I also use it to try out some new techniques in MCPatcher like the Grid format for custom colours, using some of the newer features in the Legacy pack would break quite a few of the older worlds so JimStoneCraft Editions is more cutting edge but may not work on older versions of Minecraft or MCPatcher, it also has no support for Optifine at all, while John Smith Legacy pack has limited support.

Milestone Resource Packs

Please note that these older pack are no longer supported, are for older releases of Minecraft but they can be useful if playing older CTM maps that require an older release of the pack.

Minecraft 1.7.10

These two Resource Packs require MCPatcher to get the best out of them and have very limited support for Optifine.

[John Smith Legacy 1.7.10 v1.2.21](#) - 2nd August 2014 - 12.8MB - [Changelog](#)

John Smith Legacy JSC v1.0.28 - 2nd August 2014 - 11.9MB - [Changelog](#)

Minecraft 1.6.4

John Smith Legacy 1.6.4 v1.1.8 - 16 July 2013 - 9.1MB

Minecraft 1.5.2

John Smith Legacy 1.5.2 v1.1.0 - 4th July 2013 - 11.7MB (the Minecraft 1.5.2 pack is also compatible with Minecraft 1.4.7)

Resource Pack History

Here's a list of all the previous releases of the John Smith Resource Packs and John Smith Texture Packs, including the JimStoneCraft Editions.

John Smith Legacy

John Smith Legacy 1.8.2 v1.3.11

6th February 2015 - 1.8.2-pre6 - 13.1MB

John Smith Legacy 1.8.1 v1.3.10

31st December 2014 - 1.8.1 - 13MB

John Smith Legacy 1.8.1 v1.3.9

27th December 2014 - 1.8.1 - 12.9MB

John Smith Legacy JimStoneCraft Edition

John Smith Legacy JSC v1.1.11

6th February 2015 - 1.8.2-pre6 - 12.4MB

John Smith Legacy JSC v1.1.10

31st December 2014 - 1.8.1 - 12.4MB

John Smith Legacy JSC v1.1.9

27th December 2014 - 1.8.1 - 12.4MB

John Smith Alternatives

There are 921 alternate textures for the John Smith pack, here's the alternative texture sheets and the sliced individual textures.

Due to the work involved I cannot support these files and you'll have to rename some of them, move and replace the texture you want yourself.

John Smith Alternatives - 3.7MB

Usage Guidelines

Things you can do

- Use these textures as placeholders in a vanilla or modded pack.
- Edit, use and share them as long credit is clearly given to JimStoneCraft, JohnSmith and JohnSmith Technician's Remix (JSTR).
- You're encouraged to use this pack in any screenshots or videos you like and are free to monetize your videos as long as you put a link to this page in the video description.
- You're free to modify this resource pack for your own personal use, but you may not redistribute your modified pack.
- Make this pack your official private server resource pack (you and a few friends), your friends must obtain the resource packs from this page.
- You can with permission host the pack yourself on a public server for Multiplayer gaming but only in unmodified zip form.
- Adventure map makers can provide a modified copy to go along with their map as long as you put a link to this with your map.

Things you can't do

- You're not allowed to use these textures in a customizer or in any other games other than Minecraft.
- You may never post a link to these packs behind adf.ly or any other for-profit service, a lot of work is put into these packs and I wouldn't want others to make money from it.
- The John Smith Legacy JimStoneCraft Edition Resource Pack is for personal use only, so please don't use it on a public Multiplayer server, it's fine to use on a private server with friends, just follow the rules.

These rules can be changed at any time.

Authorized Download Locations

You'll only find the latest release of the John Smith Legacy Resource Pack and the John Smith Legacy JimStoneCraft Edition Resource Pack on this page, if you have downloaded it from somewhere else then it's probably out of date and may have been modified, please report it on the contact page with a link to the site in question and download the resource pack from this page.

If you want someone to download this pack, please point them to this page.

John Smith Legacy Resource Pack and John Smith Legacy JimStoneCraft Edition Resource Pack.
